

Trends & Tips

Choose K and A Carosella, LLC to assist you through all your remodeling needs! Give us a call us @ 215-465-2700 to get started.

Employee Spotlight: Joe Hari

Joe Hari is a new member to the K and A Carosella team. Let's learn a little bit about Joe's talents that he brings to work each and every day!

Joe started his career as an apprentice cabinet maker with a company out of Horsham. He would use the next several years to hone his cabinet making and installation skills. While installing some cabinetry on a new construction site, he took an interest in the construction/remodeling trade. This led him to designing and building an addition onto his own home. He would use the next 13 years developing and applying a thorough understanding of the many facets involved in the remodeling process.

"Working with my hands to create something that someone would be able to use

from building cabinetry to remodeling full rooms or an entire house just felt right."

The knowledge he has acquired coupled with a strong work ethic and communication skills allows Joe to be the best possible tradesman he can be. He feels his goal is to exceed a customer's expectation of their project as well as their personal experience.

Joe has been a great asset to the team. His passion for his work really shows each and every day! We are happy to have him aboard!

RECIPIENT OF MULTIPLE REMODELING INDUSTRY AWARDS 2008, 2009, 2010

Design Build... What are the Benefits?

K and A Carosella, LLC is a Design Build firm.

This is a system where all elements of the project come together under one roof. This means that the contractor, carpenter, interior designer, project manager, and office manager all work together seamlessly integrating every aspect of the project.

What are the benefits?

Cost Saving – Since the contractor, designer, and builder are all under one roof this allows the project to be more cost-saving and efficient. Less surprise costs come up and clients are more aware exactly what they are spending. And because the designer and contractor are working on the same team it is much easier to determine the costs of the project early on when the design is being developed.

Time Saving –The Design Build process eliminates the competitive bidding process which in turn allows the project to be completed on time.

The Design Build system makes the whole process less stressful for the homeowner. They can feel confident that every aspect of the project is being managed by one company. And since one company is responsible, the final result of the project will achieve and hopefully exceed expectations! Give us a call and we would be happy to talk to you more about this system and how this will benefit you on your next project!

PA law now requires that home renovation contractors register with the state.

For your protection, always ask for your contractor's registration number.

Our registration is:

Spring is almost here...

It's time to put attention on your outdoor spaces...

After a long harsh winter I think we are all ready for some spring weather. This is the time of year to start thinking about your outdoor living spaces, and what you can do to create more curb appeal to your house, as well as, an inviting spot for entertaining. A well-designed deck is one way to do this.

First, you will need a well designed professional deck design along with material specifications. There are countless options of designs and features you may want to consider, but we can help you with this step. You may also want to become familiar with the different decking materials available to you. The materials nowadays range from wood, composites, aluminum and PVC. Each material has advantages and disadvantages pertaining to your lifestyle and your level of maintenance. If you are thinking about re-vamping your outdoor living space, give us a call today to discuss further!
